# Mobile Capture for remote workers

TIME TO THINK DIFFERENTLY  
ABOUT WORKING REMOTELY

## The definitive solution for capturing information on the move

FlowMatrix allows companies and organisations to optimise the management of information through efficient, secure and audited business process automation. FlowMatrix connects MFP devices, mailroom scanners, client desktops and core business applications through a highly powerful rules-based delivery engine and client collaboration tools.

## The tablet and smart phone solution

The FlowMatrix Mobile App provides a wireless information acquisition and submission solution for field workers. Using just a tablet or smart phone in conjunction with a wireless scanner users can in a few simple steps capture and submit high quality images into content systems and workflows. There is no need to be connected to an office network.

Documents can be sent via secure internet connections from just about any location. In addition users can also capture and send photos from their smart device – ideal for site based information gathering. The innovative connector has been developed for Apple, Android and Windows tablets and smart phone devices allowing documents to be captured without delay, straight back into office or Cloud based applications.

With real-time submission, processes can begin the moment a document or form is completed in the field. The solution extends the office environment to the very edge of the organisation's operational boundaries.

# The fast track solution for **rapid** remote submission

The FlowMatrix Mobile App Civica App as an example uses a combination of Reference Types, Sub Areas and Index Trays to submit a batch into the correct Civica workflow. The navigation fields are dynamically updated when the smart device is online. Documents can only be submitted when an Index Tray is correctly selected and a user completes the Batch Name and Date fields.

The Remote App can be fed directly from the Canon Capture-on-Touch application. The FlowMatrix App also provides a function to either take or pick a photo on the smart device and also submit though to a content store. Capture-on-Touch is a Canon technology that detects, synchronises and connects with Canon wireless scanners which can also operate from a combine mobile power source and wireless hub. By combining a diminutive yet highly cable wireless scanner with a simple smart phone or tablet the time and effort needed to acquire information becomes significantly reduced. Having to post or take long trips back to the office become a thing of the past.

*Available soon for Windows,  
Android and Apple Smart  
Phones*

**Capture OnTouch**  
Mobile

1. Detect & Synchronise  
Scanner with Tablet/Smart  
Phone Wirelessly

2. Easily Capture and  
Check Document  
in Capture-on-Touch

3. Profile Document  
into Civica W2 and  
Submit to Index Tray

## Key Features

- Available for Apple, Android and Windows Tablet & Smart Phones.
- Works with Canon Capture-on-Touch wireless scanners for total portability.
- Can submit documents over the internet securely for real-time process.

# About our business

## we pride ourselves

Paper River is a leading UK developer of information capture and processing tools. We have a full suite of in-house tools for Forms Processing, Invoice Processing, Digital Mail Room and Correspondence Routing all built around a rules based processing engine. Our products are designed to automate the capture and processing of information by extracting and using the intelligence within a document. Built around a system of user, group and document work queues, users can easily and simply make decisions if needed by using fully collaborative desktop interfaces. Our solutions save time and reduce costs almost immediately.

## We also develop other solutions

### **Business Process Automation**

Full automation of unique client information processes

### **Contact Centre Processing**

Minimum click capture, audit and receipting for one-stop shops

### **Distributed Capture**

Capture by MFDs & network scanners into electronic content

### **Digital Mail Room**

Capture, categorisation, batch process and workflow

### **EDRMS Migration & Legacy Archive Capture**

Migration between content systems and paper archive digitisation

### **Invoice Processing**

Comprehensive automation with line item, approval and goods receipting.

### **Planning Processing**

Fast planning application capture with publishing, archive and redaction – including plans.

### **Remote Mobile Capture**

Remote wireless capture of documents and images for mobile workers.

### **Secure and Controlled Printing**

Pull printing, print room, information firewall and cost management

### **Web & Forms Capture**

Production of web, smart phone, tablet and paper forms.
